NO:	Activity	Who & How Many Maybe Harmed?	What are the HAZARDS? & Reasonable Foreseeable Worse Case Injury	Existing Control Measures	Likelihood	Severity	Risk Factor	Additional Control Measures	Owner & Date	Result Risk Fa						
			Worse Case Injury (RFWCI)	(1) Traffic management plan in place. (reference document) including:												
	Participant Parking in and around Harby Village			(2) Free Park and Ride option outside village at Larger Aerodome - reference "Participants information Pack"				(a) Maximise off-coad parking at Park and ride and design to minimise the reversing and to keep separate from participants: (b) Mobile manufacts it was their whiche headights to help direct participants to their vehicles after results. Sources at 160-45 Sources at 175-74 (4 Barch 5023) (c) Signs stating Class park and sources risk to be installed at park and sides girls to the event.	BC organising committee Marshalls on event day Mobile marshals on the day Marshalls on the day of the event	-						
1		Participants (<1300) and other pedestrians	Vehicles hitting pedestrian	(3) Free Park and Ride option outside village at Mainline and Landings - reference "Participants Information Pack"	2	3	Med (6)	(g) Signs staling Care parked or owners risk to be installed at care parks prior to the event. (g) Numbers of cars at each car parking location and parked on side of loadside to be counted, in preparation for	Marshalls on the day of the event BC organising committee on the day of the event	Lo						
				(5) Parking restrictions with cones and barriers within vitage	-			future events. (h) Develop map to identify car park restriction areas and add correal no parking signs on the day of the event	BC Organising Committee							
			RFWCI = Broken Limb	(7) Signs erected one entrance to village advising road users of possible disruption on the day of the event				(j) Install signs a week and 1 day prior to the event	BC organising committee							
		Other vehicles/ road users	Hitting other vehicles using or parked on the road	Reference Vehicles hitting pedestrians above				No Additional Controls	N/A	<u> </u>						
		using village roads	RFWCI = Damage to vehicle, cuts and bruises		- 2	2	Low (4)			Los						
2	Flunning, walking or traversing the run	Participants (<1500)	Runners straying from the route getting last.	(1) The course will be continuedly flagged to identify the route, including major change of deredient. (2) Maps showing route and immediate surrounding stages of the continued	2	1	Low (2)	(a) Roude maps available at start and all checkpoints (b) GPX files available to be downloaded from the website (c) A number of tortoises will be deployed across both routes to track back numers and clear sites. (d) Participants finishing after sunset will be offered high vis tops.	BC organising committee day of the event Tortoise group to be provided with a selection of tops and radio for more when'll required.	Lo						
		Spectators (10 to 100)	Getting lost. Getting Lost	(1) Controls as per participants (1) Controls as per participants	1	1	Low (1)	No Additional Controls	N/A	Lo						
		Marshalls (5 to 20)	RFWCI = Distress	(2) All marshals to be briefed on their individual positions on the course and to be provided a map. (3) Marshals teams to be contactable via two way radios, and or mobile phones.	1	1	Low (1)	No Additional Controls	N/A	Lo						
3	Participating in the run	Participants (+1300)	Common injuries associated with running/ walking RFWCI = sprains, strains. Pulled muscles,	(1) Participants advised to allow pierty of time for warm up and to cool down, via the participants information pack. (2) Water ferebarnests will be available at check points and also at the firish. (3) Runners run at their own risk, communicated via terms and conditions when entering the event. (4) Include the nature of the run, and when available	2	2	Low (4)	(a) Consider providing an aerobic warm prior to the start of the event.	BC Organising Committee	Lo						
			dehytation. Plus Aggravation of a predisposed medical condition e.g. Asthma.	the rouse being taken, within the participants information participants information participants. (6) Medical facilities are available during the run (see item 4) (1) Participants to assemble for race to start on Playing field park by village half.				(a) Road at the start of the event to be managed to minimise parking.	BC Organising Committee - on the day of the event							
				(2) Road will be manshalled at start, to prevent traffic other than emergency vehicle access.				(b) Hardy residents to be informed of the event date and time and sades to not gate on Scholl one. Burden Read and Dickmens Lane via Harby Journal. Also included in Village Link. (c) Just before the start of event School Lane, Burden Lane and Dickmens Lane to be controlled to minimise vehicle movement to Include event Vehicle to lead the participants at the start of event.		-						
				(3) MajorAhiner Road Crossing to be marshalled until runners have passed through (nee sheet 2 for rush); and signed, digning will be for both commitg traffic and participants. Minor mad crossings and trads will not be manned to signed for road used and stand- ners of the standard of the standard of the standard of the during the event all participants should take care, and follow the highest code. (4) Some Road crossings have to set via style (which				(d) On major roads (> 50mph) to have 'Caution Rureer' upps (first lag) to be cites 30m, second sign rices 20m), consists of the cites 30m, second sign rices 20m), consists, Location F and O Waltham Lane (marchall needed either end). Marshalls to encourage participants to run along road towards oncomity stiffs with next marshall assisting with crossing of Waltham Lane. Top and of Waltham Lane, opposite way around.								
			Being Struck by vehicles, or other road users	slow participants down). (5) Marshalls to wear Hi-Viz tabards and be issued	2	4	Med (8)	(e) Marshalls to receive pre event briefing reference and		Lo						
4	Interactions with spectators vehicles or other road users			with flags and flashing lights to alert vehicles and other road users of the participants. (5) Police to be informed that event is taking place.	-			Plan Location - one Marthall assigned lead to each major crossing and to co-colinate others. To be named on Marshall sheet given at pre-event briefing. (f) Just before the start of event School Lane (zi), and Burden Lane and to be conholded to mitimise viel kinds. Event Vehicle to lead the participants at the start of event.								
				(6) Course to be designed to minimise use of roads by participants. If required signage posted to inform traffic of runters or road and verges to be cordoned off to keep participants onto verge(s).				(g) Key road crossings have been reviewed and assessed prior to event, and marshalls allocated to crossings. Participants to follow the highway code and listen to advice of marshalls. Marshalls will have highly significates and flags. In addition to signage for wehicles and participants approaching any crossing point. Marshall points set out on second tab.								
											(7) Participants advised, via participants information pack, to keep to right hand side (unless otherwise not to the participants) of the participant of the partici				(f) Stathern Lane - gate opposite Dickmans Lane to be patilicized or re-bar placed over bottle rail to step people opening, forcing participants to use stile. (i) Bus companies along side emergency services have been informed of the event. (j) Woolsthorpe and Wood Lane CheckPoints - to locally

				be observed as and when appropriate. (8) Participants advised via information pack to carry.				year-		
				(6) Participante advised via information pack to carry- face masks to cover any situation in which closes- contact is unavoidable (e.g. entering a shop, receiving- first aid from another person)				(f) Cleaning - seating areas/eating areas will be limited, any present will be sporadically cleaned during the event.— Participante, marshalle and voluteers to used hand- sanitises which will be provided at all checkpoints.		
								(g) Volunteers and marshalls when indeers encouraged to-		
								use-face-masks-		
_				(1) Water hazards in close proximity or adjacent to the route. (Grantham Canal between Bridges 66 and 63) -						
				26 mile only. With reference to the Canals & RT Assessment tab:						
				* Grassed verge is present between towpath and canal						
				 Visbility is good along the canal in both directions Runners/walkers on 26 mile route will be accessing canal in daylight hours. 				No Additional Controls	N/A	
				* Bridges 66 and 64 - light space under bridge around a metre. Caution Runners signs to be placed either side of bridge, but note Bridge 66 is at start of route						
			Loss of footing and fall into water	where runners have to enter via a ramp and sharp right turn and have full visbility of the bridge in front (see images below:						
					1	3	Low (3)			Low
23	Running by Water courses, Grantham Canal Bridge 66 to	participants (<400)								
	Bridge 63			HE I						
				* lead vehicles follow front runners and sweepers follow last participants clearing route.						
			RFWCI = drowning	 In participants pack emergency contact number provided, at least four roaming marshalls will be spotting checking routes across the day. 						
				(1) Advise runners via website and participants information pack to maintain good hygiene practice, (wash hands) thoroughly as soon as possible after				No Additional Controls	N/A	
			Leptospirosis (Weill's disease)	event and prior to eating/ drinking. (2) Minimum interface with canals, ponds and lakes	1	3	Low (3)			Low
_				(3) Reference controls measures in medical arrangements in Section 5 above Photographs taken of the route indicate good visibility,						
				towpath at its narrowest is a metre wide, but a grassed verge is present on the opposite side to the canal at least 1.5m wide along its length.				No Additional Controls	N/A	
			Conflict with other canal users - e.g. walkers, cyclists and anglers	Advanced warning of the event will be installed at either end of the towpath (Bridges 65 and 63) two weeks prior to the event.						
				Also given the expected number (around 400) and that participants enter the canal around 15 miles into the event,						
				participants are expected to be spread out and not expected to have large numbers grouped together. The 400 number covers potential runners and walkers, with the higher risk of conflict being with runners.						
24	Running by Water courses, Grantham Canal Bridge 66 to Bridge 63	participants (<400)		Angling Clubs will be called and provided with notice of the event, but following the walkthrough, there is plenty of	1	3	Low (3)			Low
				grassed verge for anglers to position without blocking the towpath.						
			RFWCI: fall resulting in bruising/ broken limb	Main areas of conflict are Bridges 65 and 64 again Caution Runners signs will be positioned either side of the bridge where these can be affixed to existing vertical features. C&RT have requested to stakes in the ground.						
				Runners/walkers to take care when walking underneath canal bridges.						
\vdash				Maps are provided in the information packs, participants also have the option of GPX files to have on any electronic						
			Participants autiliar to a	device. Information packs and risk assessment contain emergency contact numbers.				No Additional Controls	N/A	
	Running by Water courses,		Participants getting lost on the canal	Lead vehicles will ollow the front runners and sweepers
